Resident Engineer

Sherry Kesner  
Admin. Assistant

## Street & Alley

Highland's Street & Alley (ST & A) division consistently provides cost-effective, high-quality services to the citizens of Highland to create a high standard of living for the community. Staffed by a seven man crew, the S & A division maintains more than 65 miles of roadways and over 35 miles of sidewalks. The division is also responsible with maintaining the City's storm sewer system, and street signs. The crew also provide a variety of other services throughout the year including snow removal, grass mowing and weed spraying within the right-of-way, street sweeping, tree pruning, and mosquito abatement.

In addition to all the day-to-day duties of this division during the summer time, there are a couple additional projects on the schedule for this summer.

The crews will begin next week installing a French drain system in the area between the Knights of Columbus parking lot and the residences on Northwest Manor Drive. This French drain system will help to alleviate a long time problem that the residents of Northwest Manor Drive have had with standing water in the area.

There are also plans to replace two culverts on Dolphin Drive. The condition of the existing culverts has deteriorated to the point that there is a potential for damage to the roadway. This work will begin once the work on Northwest Manor is complete.
